

What We Offer

Camp Site Scouting & Reservation Support

We help travelers locate memorable camping locations across Vermont based on the type of experience they're seeking — secluded, scenic, family-friendly, rugged, or accessible. We assist with route planning, availability research, site prep & cleaning, and real-time local insight to reduce uncertainty before arrival.

Real humans. Real-time coordination. Less guesswork. More time enjoying Vermont.

Mountain Bike Route Planning & Terrain Scouting

We build ride recommendations around your goals, comfort level, terrain preference, and travel plans. After a consultation, we map and pre-scout routes to help ensure trail accessibility, ride quality, and logistical clarity before your day begins.

Designed for riders seeking confidence, flow, and a smoother Vermont riding experience.

Hiking Logistics & Wilderness Support

We help visitors navigate Vermont's hiking landscape through route recommendations, regional insight, and logistical planning. For longer independent treks, support services may include supply coordination, route assessment, weather and access considerations, and localized planning assistance designed to reduce friction during the experience.

You choose the journey — we help make the logistics smoother.

Hybrid Outdoor Experiences

This is where movement, food, atmosphere, and recovery intersect. We design Vermont-rooted outdoor experiences that may combine elements such as hiking, foraging, riverside meals, wellness practices, fire gatherings, or seasonal food experiences.

Curated. Connected. Memorable. Built around real experiences instead of packaged tourism.
